

iPads and Tablets in Education
Alan Foley, PhD
3 January, 2013

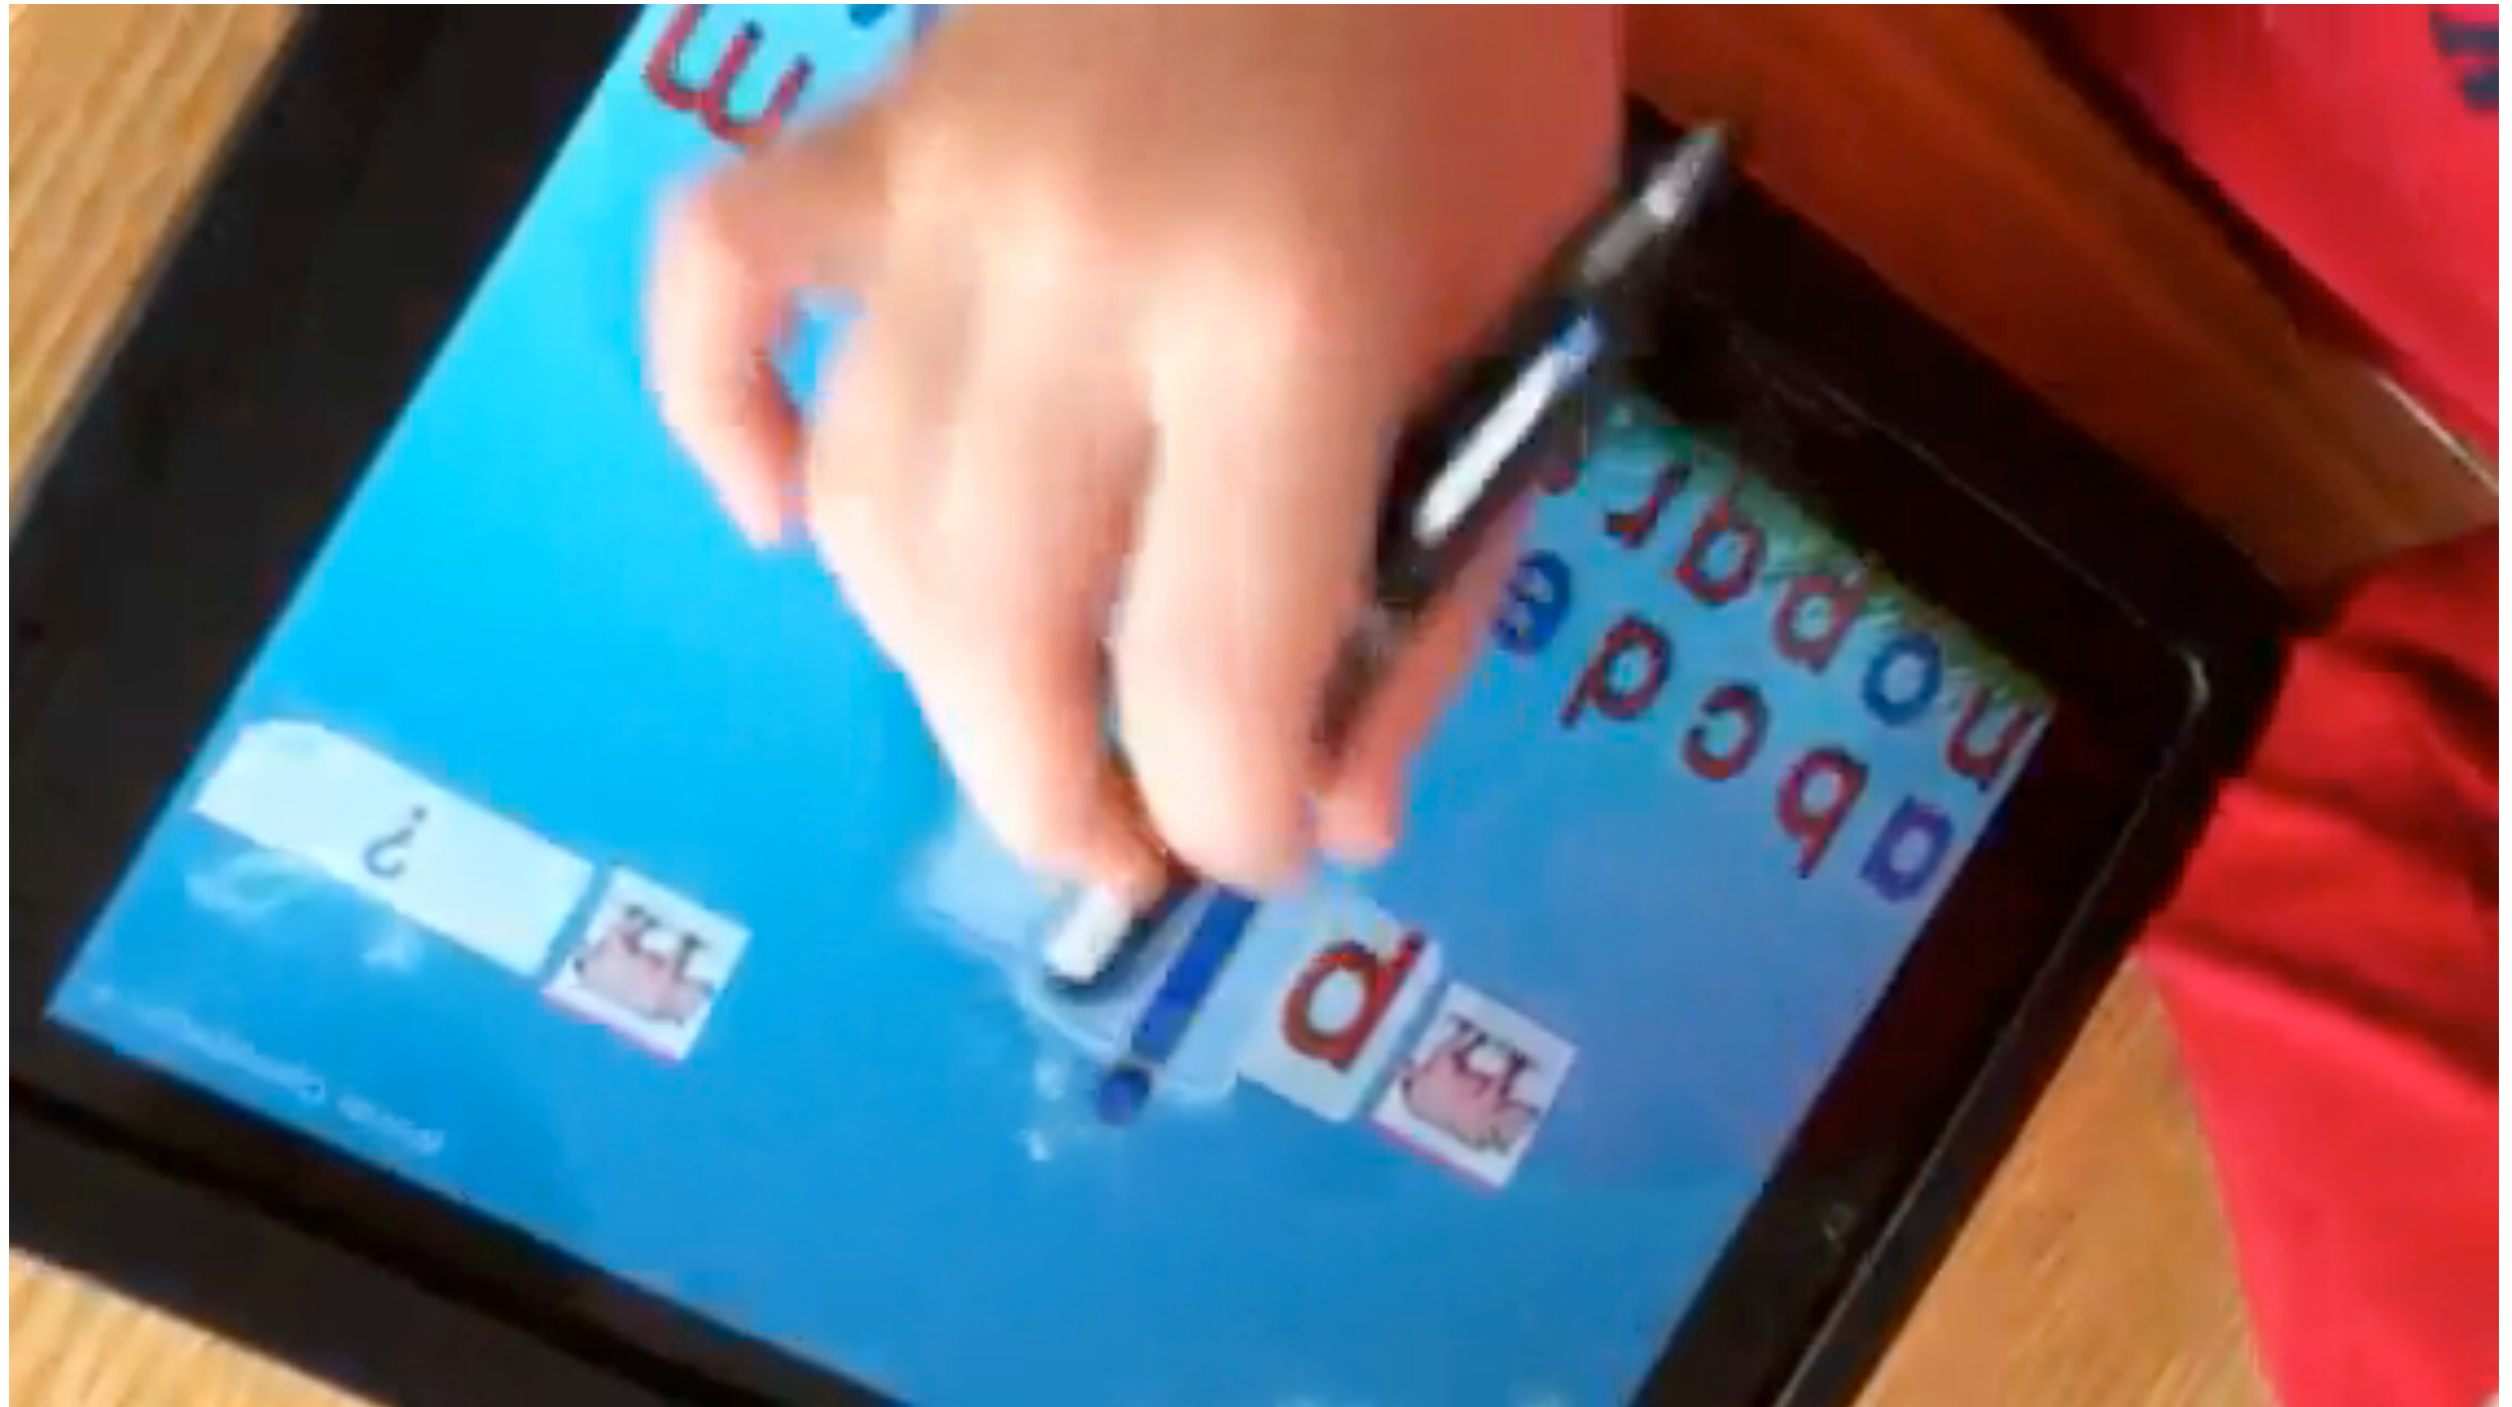

- No mouse
 - No keyboard
 - No hard drive case
 - No tower
 - No cables
-

Tablets are useful in a variety of educational contexts

The educational app market is huge (and growing)

There are many free and low cost apps

There is incredible potential for iPad use in Kenya

How do we address affordability & sustainability

Negatives

- Mobility
- Designed for an individual - Not meant to be “shared”
- Multiple user accounts not possible
- Does not mount as a volume or disk by default
- Inconsistent approach to file transfer

**THEY WANT
YOUR POD!**

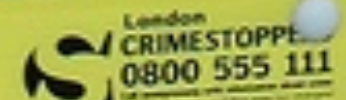

BEWARE
Street robbers are targeting
persons using mp3 music players
in this street!

SaferLambeth

Working together for a safer London

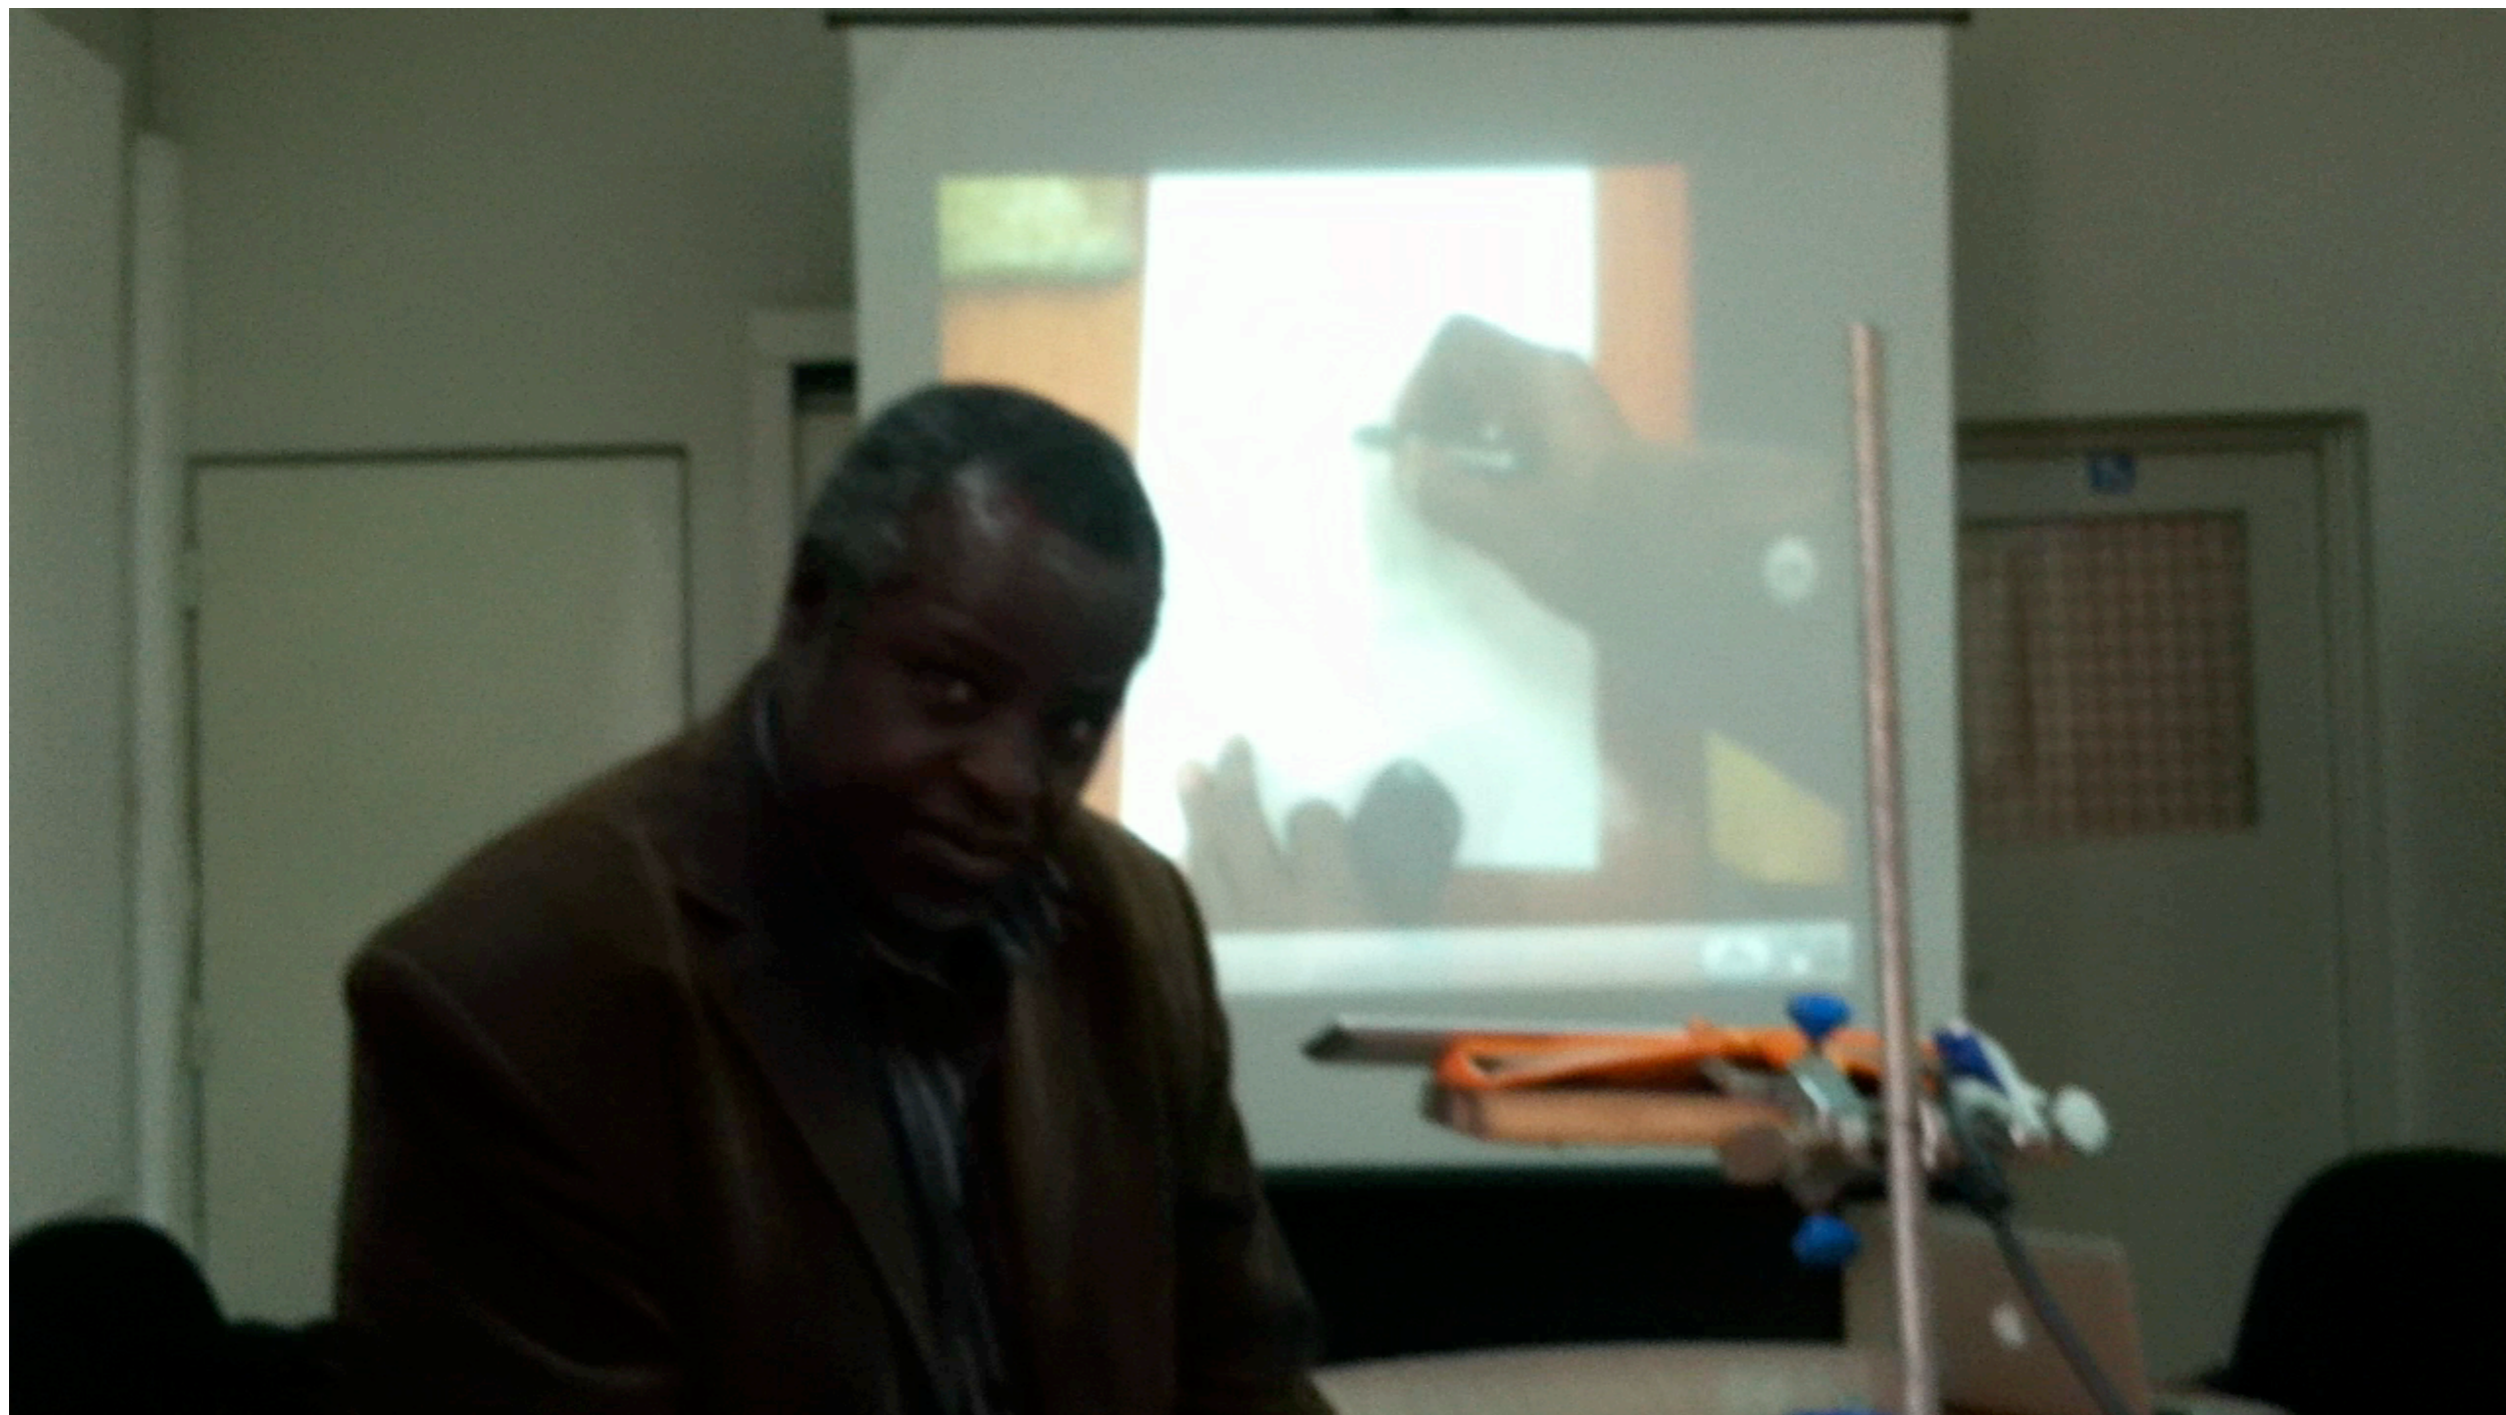

There is a large community of people figuring out cool things to do with iPads

An iPad can serve many functions...

An iPad can serve many functions...

Questions?

Why iPads?

See if you can add to this list of answers from different students and teachers:

- You can be creative on an iPad.
- It's easier to use than a computer.
- I just carry one iPad instead of a lot of books.
- It lets me know when I make a mistake and then I can fix it.
- It's more fun to learn on my tablet.
- Now I understand fractions. (Said after using several different Math iPad Apps)
- We like making movies. (iMovie App)
- Making our own music was great. (Garage Band App)
- We can change our photographs. (aka creative editing)
- The flashcards were helpful. (Flashcard App)
- The iPad is like carrying around a library that's easy to use.
- When I'm reading, I just touch a word to find out its meaning.
